

Do You Recognize This Plant?

SPRING
Leaves are light, bright green with whitish-green flowers clustered on the stems.

SUMMER
brings yellow-green, pink or reddish colors to some of the leaves with small white or tan berries following the flowers.

FALL
fruit becomes darker, dried and wrinkled, and leaves turn bright red or russet brown.

WINTER
leaves and seeds fall, leaving stick or whip-like stems or climbing vines.

Watch Out!
It's Poison Oak.
(Toxicodendron diversilobum)
