

# Who Depends on Oak Trees? Where can you find them?

First color the animals and the oak tree. Paste the picture of the oak tree in the middle of a large piece of paper. Cut out the small pictures and paste each one in its appropriate place on the picture. If there isn't enough room, draw a line pointing to where the animal would live. Name the plants and animals that rely on oak trees.

1. Acron woodpecker 2. Southern alligator lizard 3. Chanterelle mushrooms 4. Deer mice 5. Dusky-footed woodrat 6. Great horned owl 7. Leaf litter 8. Lichens 9. Mule deer 10. Oak gall 11. Oak moth 12. Red-shouldered hawk 13. Western gray squirrel 14. Earth worms
